
Quality Assurance Task Force

April 2017

Purpose

Entangled Solutions has assembled a task force of educational thought leaders with the goal of establishing quality assurance standards for non-traditional learning providers. It aims to drive industry-wide accountability and transparency in this exciting time of emergent, outcome-focused learning solutions.

The task force is convening to codify and publish a draft of the standards for public comment, then finalize the standards after a reconciliation period. After this process is complete, the task force will focus on supporting the creation of a nonprofit entity tasked with maintaining and updating the standards.
